

LOOK FORWARD TO ANOTHER YEAR OF HEALTHY CALVES. (AND MORE MONEY IN YOUR POCKET.)

ScourGuard® 4(K). The gentle and effective scours vaccine.

Calf scours is one of the most stressful and costly problems facing a farmer. So when it's time to protect your calves, you need a broad spectrum vaccine that is gentle on cows, but tough on scours.

ScourGuard 4(K) has a tissue friendly formulation and can now be administered subcutaneously.

What's more, ScourGuard 4(K) is the only New Zealand scours vaccine containing both Rotavirus G6 and G10 strains, for a truly broad spectrum vaccine.

Ask your vet about vaccinating your herd with ScourGuard 4(K).

ScourGuard® 4(K)
GENTLE ON COWS. TOUGH ON SCOURS.
